CREATING and Using CONSTRAINTs

	ALTER TABLE payments ADD CONSTRAINT FK_payments_users_id FOREIGN KEY (mobile_no) REFERENCES users(mobile_no) ON UPDATE CASCADE ON DELETE CASCADE;	Any change made to Users.mobile_no is propagated to 'payments' table
	ALTER TABLE pay_sec_update ADD CONSTRAINT FK_ pay_sec_update_ payments_id FOREIGN KEY (mobile_no) REFERENCES payments(mobile_no) ON UPDATE CASCADE ON DELETE CASCADE;	Any change made to payment.mobile_no is propagated to 'pay_sec_update' table

DROPING CONSTRAINT

ALTER TABLE payments DROP FOREIGN KEY FK_payments_pay_sec_update_id

TESTING SAMPLES

UPDATE `users` SET `mobile_no`='080899' WHERE `mobile_no`='08033927733';
